Nesma Water & Energy Wins Water Transmission Project

NW&E was awarded a 36-month, SAR 415M waterline project to address the increased demand in an ever-expanding Jeddah. The new line will carry water that originates at the Rabigh desalination plant from storage near the Taiba district 42 kilometers to the Al Faisaliyah reservoir with some branch transmission points along the way. This will bring new stability to water availability for many residents. As the pipeline will pass through heavily populated areas, NW&E engineers will bore underground to install water ducts ranging in diameter from 400mm to 1600mm along with 201 valve chambers.

This milestone project which was awarded by the National Water Company, is in keeping with the Vision 2030 national water strategy and is an indicator of continuing prosperity for NW&E.

نسما للمياه و الطاقة
Nesma Water & Energy

"We are honored and proud to serve the society in Jeddah through construction of the sweet water main Transmission Line Project. This project will play a vital role in potable water transmission services for Jeddah citizens by feeding into the Faisaliyah main reservoir from the Dahban reservoir. These types of projects and services keep us motivated for more success and contributions to the 2030 vision."

Ashraf Radwan, Chief Operations Officer

Nesma Security Secures ROSHN Contract

Nesma Security will provide security services for ROSHN Real Estate company's SEDRA housing project in Riyadh. The three-year contract, valued at SAR 27 million, will employ 72 Saudis.

SEDRA has been designed to be a modern, energy efficient community that promotes sustainability. The development will span 20 million square meters. ROSHN is owned by the Public Investment Fund.

"Nesma Security is honored that ROSHN has trusted us to provide the security for this integrated community that will consist of over 30,000 homes. This is another milestone contract for our company."
Romel Jeries, General Manager, Nesma Security Co.

Namat Wins Key Contract

Namat has been awarded a contract with TasHeel Holding Group worth over SAR 200,000. The tailoring centers will make uniforms for employees of the new "Ask Me" information service at King Abdulaziz International Airport in Jeddah. The contract calls for 450 abaya style uniforms with scarf and 200 vests for male "Ask Me" workers. Namat looks forward to serving the needs of TasHeel Holding and its many subsidiaries well into the future.

Nesma VP Speaks At Global Entrepreneurship Congress

Nesma Vice President Noura Alturki was invited to speak at the Global Entrepreneurship Congress in Riyadh. Under the theme "Rethink, Reboot, Regenerate," the event brought together world-famous CEOs, thought leaders and political leaders from around the globe for discussions and workshops aimed at establishing an effective, post-pandemic entrepreneurial environment.

On a panel discussion, Alturki remarked that her focus was on the process of creating an entrepreneurial mindset within companies so that young employees can contribute to the company's ongoing progress and improvement.

The Global Entrepreneurship Congress was organized by Monshaat in collaboration with the Global Entrepreneurship Network.

NUI Team Successfully Replaces Process Control System

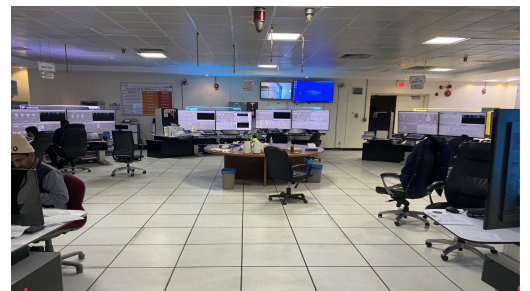

Celebrations were in order when Nesma United Industries reached the end goal of a three-year project to replace the process control system (PCS) at the Safaniyah onshore plant. The plant became fully operational after the Mechanical Completion Certificate was endorsed by the client, Aramco. Along the way, Aramco has honored the team for their professionalism, diligence and adherence to safety protocols despite the many challenges of the past few years.

The major function of the PCS, in any facility, is to maintain safe, reliable and secure operations so upgrading and replacing outdated systems is imperative. This project involved laying new communications cables, constructing a new process interface building, installing new power supply along with training for and rewarding safety protocols & behaviors.

Projects such as these help the Kingdom maintain a reliable and cost-effective production of crude oil.
